

# NEW PROTECTA® ECO-FOIL SYSTEM

Reusable cartridge system for use with Protecta® 300ml sealant foil.

The system works by inserting a 300ml foil into the reusable Eco-Cartridge, which fits into a standard skeleton gun. The cartridge has a double-ended plunger, so once the foil is empty, remove the cap and nozzle and re-fill the opposite end with a new 300ml foil.

Simply replace the cap and nozzle at the opposite end and the system is ready for use!

Protecta  
ECO-CARTRIDGE  
REUSABLE CARTRIDGE SYSTEM FOR USE WITH  
PROTECTA® 300ml SEALANT FOIL

- Cut nozzle tip to required width and screw onto the lid.
- Remove lid and insert the Protecta® 300ml foil.
- Open by slipping the end of the foil directly under the metal lip.
- Fully insert foil and replace the lid.
- Place the Protecta® Eco-Cartridge into a skeleton gun and apply sealant.
- When finished remove lid and dispose of empty foil.
- Insert new foil in the opposite end of sleeve and repeat.

PLEASE RE USE THIS CARTRIDGE
